Introduction and a little history...

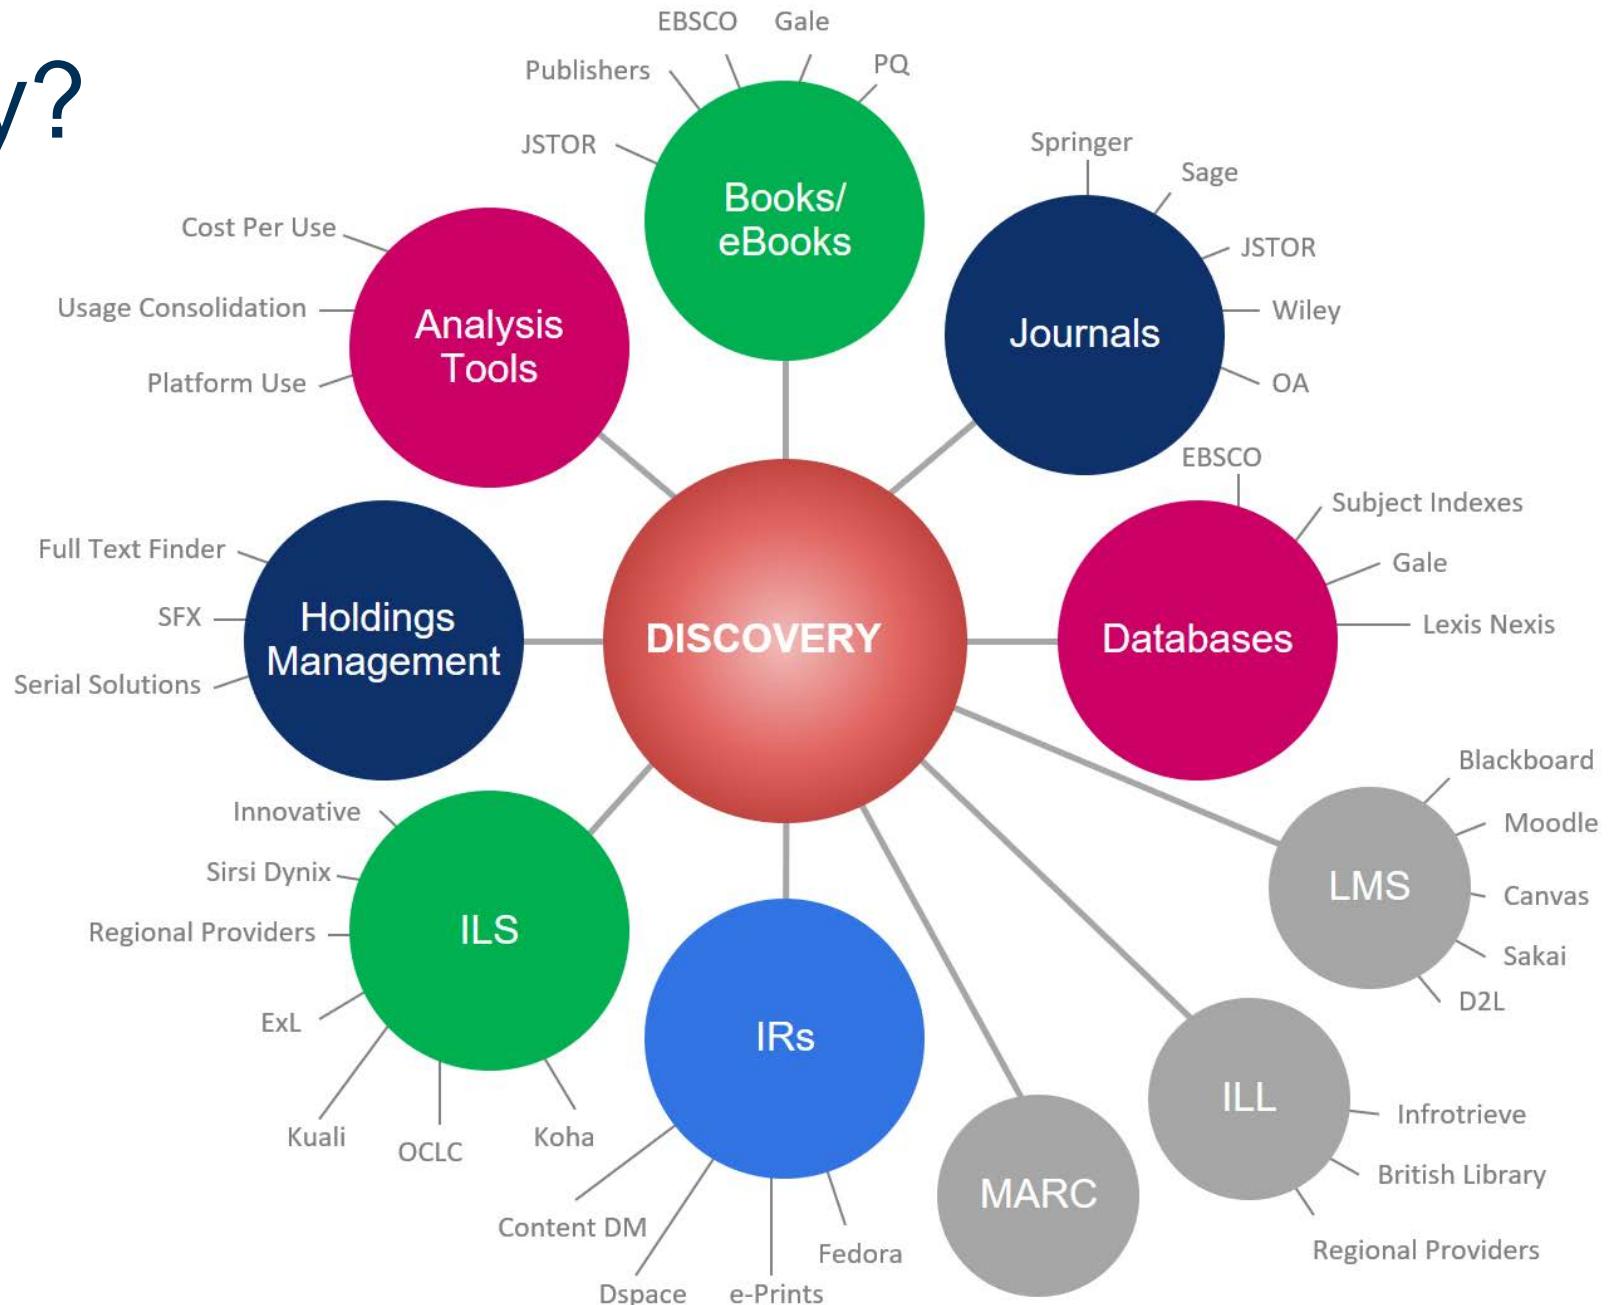

- EBSCO Discovery Service Plugin first implemented in New Zealand back in 2014

YOUR
Discovery
Front End
okoha

What is Discovery?

- A Google-like tool, simple, fast and efficient.
- Searches as many resources as possible.
- Wide range of options to refine search results.
- Enables easy access to full text or place requests.

EDS has more than
3.4 billion
searchable records

Content from
20k+ publishers,
including over 3K open-
access publishers

Over 165 apps & 1K non-
English
profiles representing
20+ languages

EDS has more than
3.4 billion
searchable records

Content from
20k+ publishers,
including over 3K open-
access publishers

Enable the following languages on the OPAC:

Español(es-ES)

English

English United Kingdom (en-GB) English (en) عربى(ar-Arab) Português(pt-PT) Italiano(it-IT)

Allow patrons to change the language they see on the OPAC.

- Language file match Koha language pack e.g. es-ES, pt-PT etc.
- default.inc applies when there is no match
- Only default installed to prevent overriding custom language files.

- Copy from github, modify and drop in folder.
EDS/bootstrap/includes/lang/
 - Submit your version via pull request on github

File	Notes	Live Update Check
IMPORTANT: Koha files to patch - the plugin will integrate through these changes.		
doc-head-close.inc	<p>OPEN doc-head-close.inc in \opac\htdocs\opac-tmpl\<themelang>\includes and add the below line to the end of the file. NOTE: there are spaces between ([and %) and (% and]) in the below code. Please remove the space for the condition to work.</p> <pre>[% IF (EDSEnabled) %]<script id="eds-app" data-edsselecttext="Discovery" data-defaultsearch="eds" type="text/javascript" language="javascript" src="/plugin/Koha/Plugin/EDS/js/EDSScript.js"></script>[% END %]</pre> <p>data-defaultsearch is used to pre-apply the Default Search Engine field from the configure screen and can contain the following values: 1. eds 2. koha 3. off</p> <p>data-edsselecttext is used to pre-apply EDS SelectText from the configure screen. These change will be overridden by values from the database and cached.</p>	PATCH
Auth.pm	<p>OPEN Auth.pm in \lib\C4 and add the below line after <code>CalendarFirstDayOfWeek =></code> at 2 possible locations.</p> <pre>EDSEnabled => C4::Context->preference("EDSEnabled"),</pre>	PATCH

Full Text Finder

Full Text Finder includes:

- knowledge base
- holdings management tools
- publication search service
- link resolver

FEATURE	BENEFIT
Publication Finder	Allows end users to search for publications in the library's holdings
Publication discipline browse	Enables users to search for publications by category such as business, art, science, and law.
Title Matching Feature	Provides direct access to the publication. Users can also use the “search within” feature to search directly within a publication.
Link Resolver	Use the Full Text Finder link resolver or select another link resolver. The decision is up to you.
Holdings Management	Leverages the knowledge base to provide known-item results for title level searching. Changes to holdings are seen almost immediately by the end users.

Access Management with OpenAthens

3

Libraries desire to provide its users access to licensed information resources but face several challenges due to complex security systems

Helping over 2,000 organisations
in 46 countries, enable access to
hundreds of thousands of journals,
databases and ebooks for over
4 million end users.

What is OpenAthens?

- Username password system for access to library resources
- Subscriber identification independent of IP
- User categorisation & statistics
- Provides anonymised user ID to publisher for personalisation

What is OpenAthens for?

- All accesses to library resources (On network/remote/mobile)
- Organisations where IP authentication doesn't work (no fixed IP)
- To integrate with an organisations own SSO system

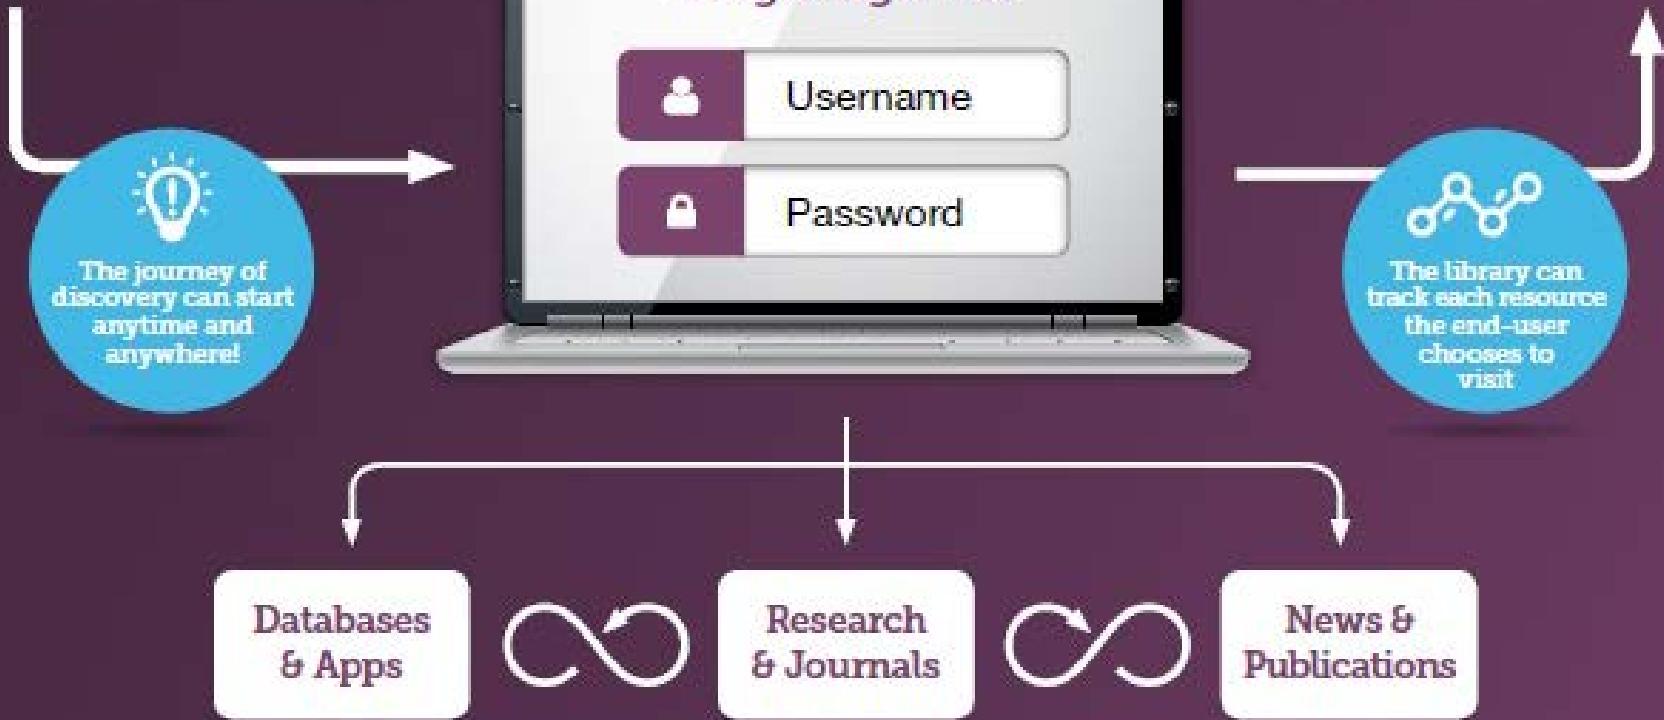

Removing barriers to knowledge

The end-user only needs to remember **one username and password**, opening up access to all available e-resources

Connecting people to information

No need to sign in again as the end-user moves from resource to resource

Integration option

Can be integrated with an organisation's own system

- LDAP, Active Directory, portal, LMS
- No new usernames or passwords
- Improves license compliance

Library resources become another application managed via the SSO system

- Improved security

Select local authentication system type.

LDAP

Connect to an LDAP directory, including Microsoft ActiveDirectory.

API

Connect via the OpenAthens Local Authentication REST API.

SAML 1.1/2.0

Connect to an local identity provider using SAML.

ADFS

Connect using Microsoft ActiveDirectory Federation Services.

SirsiDynix

Connect to a SirsiDynix library system for authentication.

Koha: OpenAthens: Setup Tool

When you connect Koha to OpenAthens you have the ability to map attributes from one system to the other - e.g. the 'email' for a borrower could be mapped to an Email address attribute in OpenAthens.

[Click here](#) to learn more about Attribute mapping.

Export Attributes for mapping

Visit [OA Admin](#) to configure
the OA LA API profile

Select the following borrower details to send to Open Athens on user logon.

Note: These need to be mapped in the Open Athens Admin > Management > Connections > Local Authentication > Attributes.
userid will be passed by default.

<input checked="" type="checkbox"/> borrowernumber	<input type="checkbox"/> address	<input type="checkbox"/> fax	<input type="checkbox"/> B_zipcode	<input type="checkbox"/> gonenoaddress	<input type="checkbox"/> relationship	<input type="checkbox"/> altcontactphone	<input type="checkbox"/> altcontactfirstname
